

CommLighter™ UC450 Solar Commercial Signs

- Small portable sign provides outstanding support for your marketing efforts!
- Built-in solar panel with rechargeable battery provides years of trouble-free service!

Our newest solar-powered sign family provides a larger surface area for your "message". Place this attractive sign near street corners, in open areas or on the front of your store to provide directions to your business or highlight a "Special Event". These illuminated signs are pleasing in appearance with their soft glow. Operate the light with a constant illumination or switch it to a blinking mode to improve eye-catching visibility.

Special Features

*Bright, colorful sign works day and night.
Durable, non-yellowing, UV-resistant RPVC plastic housing.
Portable, quick setup.
Constant or flashing light.
Rechargeable battery.*

The concept is simple. Our ListingLighter™ technology has been adapted to a small, portable sign. Manually turn the light on or set the light to turn on at dusk and operate for up to five hours, before turning off for the night. Translucent housing radiates the internal light for hundreds of feet in each direction.

Customize the sign easily with your own color logo and message.

For more information, see the Ordering Table on page 2.

UC451 Signs are available in a range of custom sizes!!

*UC450 Lights shine bright at night!!
(OPEN sign is not lighted for comparison)*

Check out our complete range of DC-powered, energy-efficient LED signs for your in-store or window promos.
