

CommLighter™ UC950 Solar Commercial Signs

*Energy-Saving Design!
NO MONTHLY Electric Bill!!*

- *Improve your local marketing presence by advertising at night and be seen 24-hours a day!*
- *No maintenance required after setup with solar recharged battery lighting system.*

Our new commercial marketing signs are the talk of the industry. They are extending the hours of marketing exposure for special promotions and increasingly stand out in a crowded sign market. Place these high-visibility signs anywhere you need them. NO wiring is required! NO generators need to be refilled! NO Monthly electric bill!!

The concept is simple. Our patented internally-lighted signs have built-in solar panels to recharge the internal battery. The light turns on at dusk and operates for several hours, before turning off for the night. The next day the battery recharges and the cycle starts all over.

Translucent panels radiate the internal light for hundreds of feet in each direction. Install on the face of your building or hundreds of feet away near the road or parking lot.

Customize the sign easily with your own color logo and message.

These new signs are designed with many expensive features, but at a fraction of the price of many commercial signs. Rugged extruded aluminum housing is combined with UV-resistant sign grade plastic for year-round durability. The solar panel is mounted on top or remotely for best solar exposure. The rechargeable battery will operate for years without maintenance. The new state-of-the-art LEDs and electronics have been tested to provide years of trouble-free operation. One year warranty.

Special Features
*NO WIRING NECESSARY!
 NO GENERATORS REQUIRED!
 Large, colorful sign works day and night.
 No maintenance with built-in solar-powered battery charger.
